Dear John Doe,

We've submitted your removals from the data brokers on which we found your information. This privacy report shows each of the data brokers we've scanned, what we found, and what we're doing to remove your data. After we've submitted each opt-out, our privacy advisors go back and check each source again to make sure your information has been removed.

Although **the majority** of your listings on our removal lists will disappear within a month, some will be gone more quickly than others. For example, the data brokers that we're able to opt out of online, such as Spokeo, have already processed or will process your removal within days. Slower data brokers can **take up to 6 weeks** to honor requests. Remember: even after removals are complete, Google can take additional time to remove results from its search cache.

New data brokers will be added to our list as they appear, but don't worry – we'll submit opt-out removals for your personal information to the new ones we find. It's all included in your membership. Our privacy advisors will keep working on your behalf and when we have significant updates to your privacy report, we'll be in touch.

Thank you. Our only business is your privacy!
